

**Product Insert**

**Description:**

Cliradex is a natural, preservative-free, lid and lash towelette cleanser formulated with 4-Terpineol (T4O), which is an active component in tea tree oil. Ocular irritation, inflammation and lid margin disease are associated with poor eyelid hygiene. Unlike traditional cleansers derived from man-made chemicals, Cliradex towelettes are a natural way to keep eyelids and skin clean, comfortable and healthy. Cliradex towelettes are formulated with T4O that has been shown to kill demodex mites in in vitro assays.

**Relief from Irritation:**

- Redness and swelling
- Burning, itch or irritation
- Heavy eye crust
- Dry, flaky skin
- Excessive tears

**Instructions for Use:**

**1.** Clean hands and face.

**2.** Open the towelette packet.

**3.** Close eyes firmly, but avoid squinting so that the lashes are fully extended. Gently press the towelette onto the lash area, moving slowly from one corner of the eye to the other corner, applying to lashes as well as the skin underneath. Flip the towelette and use on the other eyelid. Afterwards, the towelette can be used to moisten the facial area around the eye. Avoid any “scrubbing” or rough motions as this may cause irritation.

**4.** Air dry for about 30 seconds before opening eyes. For full benefit, do not wash the face immediately after application.

**What to Expect:**

- For first time use, test a patch of skin on the arm and wait 15 minutes. If no allergic or abnormal skin reaction occurs, proceed to apply as instructed above.
- When suffering from severe ocular irritation, your skin may be sensitive and you may experience a transient stinging sensation. Such sensation is normal and should diminish with each use.
- Avoid direct contact with your eyes. If Cliradex gets in the eye, rinse with water or saline.
- If the user develops symptoms such as persistent or recurrent itching, swelling, or excessive skin dryness, this may be an allergic reaction/hypersensitivity to T4O (especially in the presence of a known sensitivity to fragrances or essential oils). The user should discontinue use of the product and consult their physician if any of these symptoms develop or worsen.

**Recommended Usage:**

| Symptom Severity  | Frequency of Use | Duration  | Cliradex <sup>®</sup> Cartons Per Individual |
|-------------------|------------------|-----------|--|
| Mild - Moderate   | 1x daily         | 6-8 weeks | 2 cartons                                    |
| Moderate - Severe | 2x daily         | 6-8 weeks | 4 cartons                                    |

**Storage:**

Store at room temperature away from heat or sun exposure.
